Dear Javad

Choosing your master thesis is in most cases possible. However, you would have to find a professor, who is supervising your thesis.

Regarding the application procedure: you will have to send us all documents that were uploaded to the online portal also in a paper-based version. All documents have to be provided either as an original or at least a certified copy of the originals.

All necessary information can be found either on our information page (<https://www.wi.uni-muenster.de/studies/master/application>) or within our FAQs (<https://www.wi.uni-muenster.de/studies/master/faq>).

Best regards,  
Pascal

Betreff: Javad Alizadeh - master

Dear Madam/Sir,

I graduated 3 years ago from a top university in Iran. Since my

graduation, I improved my programming knowledge and skills especially in web and mobile applications and worked for some well-known companies. I'm so interested in cloud computing and I want to choose it as my master's thesis. Is it possible to choose it on my own? Because in last couple of years, I focused on this field.

And after online application, what documents are required to be sent to the university?

Are copied documents valid?

Yours sincerely,  
Javad Alizadeh Shabkhoslati
